Florida Senator Carey Baker (R-20) recently received the coveted “Water Conservation Champion” award from the Florida Ground Water Association.

The award was given at the close of the 2009 legislation session in Orlando at the Florida Ground Water Association’s Annual Convention on May 9, 2009.

Senator Baker, representing District 20, is serving his second term in the Senate and serves as Chair of the General Government Appropriations Committee, the Transportation, Agriculture, Ethics & Elections committee, Judiciary committee, the Policy Steering committee on Social Responsibility and the Ways and Means committee.

This year Senator Baker sponsored SB 2530 the licensing criteria legislation for water well contractors, and was instrumental in preserving support of the Inland Protection Trust Fund, which provides resources for the clean up of fueling stations with leaking fuel tanks, thus providing valuable protection for Florida’s ground water.

Senator Baker has recently announced his candidacy for Commissioner of Agriculture.
