DEAR CONVENTION ATTENDEES

The Florida Ground Water Association (FGWA) is very excited to welcome you back! We missed seeing our members, vendors and colleagues in 2020 and look forward to celebrating our 80th Convention Anniversary with all of you. This event is important for the industry, as it brings together hundreds of your colleagues, all of whom share a passion for protecting the most precious resource, ground water. As you page through this yearbook, notice the opportunities available to you for networking with vendors and friends (old and new).

The FGWA Annual Convention has continued to grow through your participation and support. I would like to give a special thank you to our Convention Committee for their hard work in preparing an outstanding lineup of presentations for our members. In addition to informative sessions, we're looking forward to our Friday Reception, Annual Silent Auction and Trade Show Hall.

This convention would not be possible without the support of our sponsors and exhibitors. Please be sure to visit the trade show during the convention to see the latest products, services and techniques. As a bonus, you can also receive one CE credit for Friday and one CE credit for Saturday when you visit with the vendors in the Trade Show Hall.

As a reminder, the convention offers attendees 12 hours of approved CE credit needed towards your license renewal.

We appreciate that you are here with us to celebrate our profession and we hope you enjoy the convention!

IMPORTANT CONVENTION INFORMATION

COVID-19 SAFETY PROTOCOLS

All participants of the 2021 Annual Convention & Trade Show are required to follow current and local COVID-19 safety protocols.

CONTINUING EDUCATION CREDITS

In order to comply with the DEP Manual for Approved Coursework, all attendees MUST remain in the classroom for the entire 50-minute session in order to receive credit for the course. Anyone entering the classroom after the start time will NOT receive credit for the course and no exceptions will be made. You will need to obtain a minimum of 6 CEC's in the R/R category and a maximum of 6 CEC's in the S/B category.

COURSEWORK CERTIFICATE

Attendees will receive a certificate at registration check-in. In order to obtain credit for the coursework, you must write the code for each session attended. The code will be provided by the speaker. At the completion of the convention, drop off a copy of your certificate at the registration desk. This is required whether you plan to convert your CE credits onsite or not.

CONVENTION EVALUATION FORM

The convention evaluation form is included in your attendee registration packet. Make sure to complete the form for each course you attend and return to the FGWA registration desk at the conclusion of the convention.

DISCOUNTED ATTENDEE GRAB & GO FRIDAY LUNCH

Attendees with full registration will receive a ticket to obtain a discounted lunch on Friday, June 4th. Lunch will be provided in the Convention Center and will include a sandwich, chips and drink. This lunch is sponsored by Franklin Electric.

FRIDAY RECEPTION & SILENT AUCTION

Join us at the Friday Reception sponsored by Geoprobe Systems and DRILLMAX to celebrate our 80th Annual Convention. The reception will include our Annual Silent Auction benefiting the FGWA's mission for the protection, the promotion, and the responsible development and use of ground water resources in the State of Florida.

2021 SCHEDULE OF EVENTS

Earn 12 total CE credits, including the required 6 CE credits in Rules/Regulations and Well Construction.

THURSDAY • JUNE 3

DAY 1 is all about enjoying time with your colleagues and raising money for a good cause.

12:30 PM

FGWA Bob Caswell Memorial Golf Tournament *(separate registration required)*

Sponsored by: Goulds Water Technology

5:00 PM – 6:30 PM

Convention Registration Desk Open — *Omni Convention Center*

FRIDAY • JUNE 4

DAY 2 – Friday will offer six (6) hours of CE credits.

7:00 AM – 6:00 PM

Convention Registration Desk Open — *Omni Convention Center*

8:00 AM – 8:50 AM

SESSION 1

OR

SESSION 2

Drilling Methods and How They Relate to SWFWMD Well Construction Rules (1 R/R Credit) — *National Ballroom*

presented by David Arnold, P.G., SWFWMD

The Southwest Florida Water Management District (District) manages the water resources for approximately 10,000 square miles in all or part of 16 counties as directed by state law. The mission of the District is to protect water resources, minimize flood risks, and ensure the public's water needs are met. In this session, David Arnold, P.G., will provide an overview of multiple drilling methods and how the methods relate to SWFWMD Well Construction Rules

Geology for Drillers – a SRWMD Perspective (1 R/R Credit) — *Osceola Ballroom AB*

presented by Warren Zwanka, P.G., SRWMD

This course will cover Florida's geologic history, physiography, cuttings description, groundwater levels, potentiometric mapping, sinkholes, geologic investigations, well design, and geophysical logging.

9:05 AM – 9:55 AM

SESSION 1

OR

SESSION 2

Bacteria Testing for Your Potable Water Well (1 R/R Credit) — *National Ballroom*

presented by Eric Duderstadt, Water Systems Engineering

The presence of bacteria within potable water wells is widespread and responsible for a variety of problems such as; loss of production, decreased water quality, corrosion, and increased health risks. This course focuses on how to develop a specialized approach to bacterial testing which assesses the microbial makeup of a sample from multiple vantage points, offering a more complete picture of conditions. Correct methods for sample collection, proper handling of samples, and customizing testing with the laboratory to fit your needs will be discussed. Data compiled from thousands of wells across the United States will be used to illustrate common relationships, occurrence rates, and trends that can develop among groundwater bacteria and how this knowledge allows for a comprehensive assessment of the biological conditions within a well.

Groundwater Characterization with Direct Push Sampling Tools Demo (1 R/R Credit)

— *Outside Demo Behind Convention Center*

presented by John Martinuzzi, Team Geoprobe

Ground water preservation is a key element to a healthy environment and the future sustainability of our environment. One of the most effective ways to characterize ground water is with Direct Push sampling methods. Direct Push offers groundwater sampling tools and accessories to help characterize the water quality and extent of potential contamination during environmental assessments and investigations in unconsolidated soils and sediments. This active demonstration will show Direct Push ground water tooling and samplers being used to collect ground water samples.

FRIDAY, JUNE 4, CONTINUED

10:10 AM – 11:00 AM

SESSION 1

OR

SESSION 2

Diagnosing Electric Motors with Meters (1 S/B Credit) —National Ballroom

presented by Bob Lilland, Franklin Electric

How to diagnose a submersible single and three-phase electric motor along with control boxes and magnetic contactors using meters. (Basic motor construction. Single phase & 3 Phase motors. How to diagnose these motors using meters and how to read these meters? How to diagnose a control box and 3 phase starters with meters?)

Equipment Maintenance Program Solutions to Maintaining Your Drill Rig for Maximum Performance (1 S/B Credit)

— Outside Demo under Porte-Cochere

presented by Donnie Wood, DRILLMAX

Keeping your equipment properly maintained can minimize downtime, decrease maintenance costs, increase profitability, and keep your customers satisfied! Topics covered in this session will include but are not limited to: hydraulic maintenance, engine maintenance, and drill head maintenance. Attendees will participate in a pre-inspection walk around of a drilling rig and be provided inspection forms and maintenance guidelines for reference.

11:00 AM – 12:20 PM

Lunch on Your Own

Attendee Discounted Boxed Lunch Sponsored by: Franklin Electric

*See ticket included in attendee packet for details. Lunch pick-up is located in the Convention Center. Available to Full Registrations only.

12:00 PM – 5:00 PM

FWWA CE Conversion Table Open —Omni Convention Center

12:20 PM – 1:30 PM

FGWA Membership Meeting (1 R/R Credit) —National Ballroom

This update will provide FGWA members information on the latest news and business for the association and what can be expected for 2022. Ryan Matthews, FGWA Lobbyist, will also be on hand to present an update on the 2021 legislative session and what bills will have an impact on FGWA members and the water well construction industry. Leadership will also discuss any pertinent changes to industry related rules and regulations.

1:40 PM – 2:30 PM

SESSION 1

OR

SESSION 2

Benefits of Using Polymers in Drilling Fluids (1 R/R Credit) —National Ballroom

presented by Doug Keller, Baroid IDP

This course will discuss the benefits of using polymers in drilling fluids: provides better hole stability, helps in maintaining the intended size of the hole, ease of setting casing, how a thin strong wall cake can reduce development time, how an engineered fluid can improve penetration rates. The course will also discuss which polymers to use, depending on the formation of the geology, to enhance the drilling fluid properties desired.

Lobbying 101: How to Win Friends & Influence People in Tallahassee (1 R/R Credit) —Osceola Ballroom AB

presented by Ryan Matthews, FGWA Lobbyist, Peebles, Smith & Matthews, LLC

While most people believe that lobbying only occurs during a 60-day legislative session, it actually takes place 365 days a year in regulatory agencies, executive offices, water management districts, etc. This course will teach the participant how to effectively engage elected officials, regulatory staff and attorneys, as well as policy wonks. Agency staff regularly contemplate administrative rules/changes that can have just as damaging effect on doing business as passing/repealing a state statute. Learn how to maneuver each process in order to achieve your desired result.

2:30 PM – 5:30 PM

Trade Show Hall Grand Opening (1 S/B Credit)

Convention Lounge Sponsored by: Preferred Pump & Equipment

5:30 PM – 6:30 PM

80th Anniversary Reception, Silent Auction, Outside Exhibits —Omni Convention Center

Sponsored by: Geoprobe Systems and DRILLMAX

2021 SCHEDULE OF EVENTS, CONTINUED

SATURDAY • JUNE 5

DAY 3 – Saturday will offer six (6) hours of CE credits.

7:30 AM – 3:30 PM	Convention Registration Desk Open —Omni Convention Center	
8:00 AM – 9:00 AM	Breakfast with Exhibitors <i>Breakfast Sponsored by: Sun-Star Electric, Inc.</i>	
8:00 AM – 10:00 AM	Trade Show Hall Open (1 S/B Credit) <i>Convention Lounge Sponsored by: Preferred Pump & Equipment</i>	
8:00 AM – 4:30 PM	FWWA CE Conversion Table Open —Omni Convention Center	
10:10 AM – 12:00 PM	SESSION 1	SESSION 2
	Hydrogeologic Classification System for Water-Well Boreholes (2 R/R Credits) —National Ballroom <i>presented by Thomas Hanna, Johnson Screens</i> <p>This course will include a two-part workshop including a lecture and a hands on exercise of logging cuttings from water-well boreholes. This classifications system will provide a framework that is uniform and can be taught to and used by contractors, regulatory, and hydrogeologists and will allow better correlation and interpretation of data. The initial part of a class is an introduction of the HCWSB. This will include a background in what controls the flow of water in aquifers and the basics of logging water well boreholes. By understand what controls the flow of water in the aquifer a simple but detailed log can be completed that is menu driven – meaning that it can be incorporated into digital storage of data or logged using check boxes. The second part of the class students will have a hands-on experience to log a suite of drill cuttings and select filter pack and slot size for a municipal water-supply well. The HCSWB will help document unconsolidated sediments so the relative hydraulic conductivities can be accessed based on grain size, location of significant water-producing zones that are observed during drilling.</p>	DOT Compliance Basics (2 R/R Credits) —Osceola Ballroom AB <i>presented by Jim Smith, MS, CSP, Employbridge</i> <p>This session is designed to provide attendees with the necessary knowledge in compliance with the requirements of DOT. This session will cover applicability of federal regulations, hours of service, the “must haves” for carriers, and much more. Learn the latest techniques to keep drivers on the road and in compliance!</p>
12:00 PM – 1:20 PM	Lunch on Your Own	
1:20 PM – 3:10 PM	SESSION 1	SESSION 2
	Civilian Response to Active Shooter Events Course (2 S/B Credits) —National Ballroom <i>presented by Senior Trooper Mark J. Horn, FHP</i> <p>Law enforcement officers and agencies are frequently requested by schools, businesses, and community members for direction and presentations on what they should do if confronted with an active shooter event. The Civilian Response to Active Shooter Events (CRASE) course, designed and built on the Avoid, Deny, Defend (ADD) strategy developed by ALERRT in 2004, provides strategies, guidance, and a proven plan for surviving an active shooter event. Topics include the history and prevalence of active shooter events, civilian response options, medical issues, and considerations for conducting drills.</p>	How Water Well Contractors Can Become Invincible to Lawsuits and Save Thousands in Taxes (2 S/B Credits) —Osceola Ballroom AB <i>presented by Larry Oxenham, American Society for Asset Protection</i> <p>Is your financial house in order? Discover the tools you can use to become invincible to lawsuits, save thousands in taxes, and achieve financial peace of mind. By the end of the presentation you will know how to: 1) Protect 100% of your assets from lawsuits. You will learn how to make yourself so unattractive to a plaintiff attorney that they will never pursue a lawsuit against you. 2) Save thousands of dollars each year in taxes. You will learn five tax reduction strategies most people fail to utilize, which could save you more than \$10,000 each year in taxes. 3) Avoid probate and eliminate all estate taxes. You will be taken through a checklist of items that are important to every estate and business succession plan. You will learn what you should be doing now to prepare for successful business and estate succession.</p>
3:20 PM – 4:10 PM	SESSION 1	SESSION 2
	Grouting & Placement (1 R/R Credit) —National Ballroom <i>presented by Stewart Krause, Wyo-Ben, Inc.</i> <p>This presentation will touch on different types of grouting material and placement techniques used in the industry including chip, pellet and high solids bentonite, as well as cement grouts. The discussion will include pros and cons of each type of material and placement of the grouting material.</p>	Pump Basics (1 S/B Credit) —Osceola Ballroom AB <i>presented by Alan Bixler, Grundfos</i> <p>This course will start with a basic review of submersible well pumps and their construction. We will then learn about the most fundamental pump document – the performance curve. You will learn to read and understand the information provided in the pump curve and to interpret the graphically provided information. Finally, you will learn how to use this information to properly size and select a submersible pump.</p>

SAFE DRINKING WATER, ONE GLASS AT A TIME

For decades you've been trusting the robust line of Goulds Water Technology Jet Pumps to deliver and boost water in a variety of applications. Built tough, and withstanding rigorous testing, these jet pumps provide industry-leading benefits. And here's one more...

Many of our jet pumps now proudly display the NSF 61 certification, ensuring safe water for your customers when used in drinking water systems.

DRINKING WATER
NSF/ANSI 61 & 372

MEET YOUR SPEAKERS

DAVID ARNOLD, P.G.

David Arnold, P.G., is the Southwest Florida Water Management District's (District's) well construction manager overseeing permitted well construction activities within a 16-county jurisdiction, which includes three county permitting/compliance delegations. Arnold has more than 10 years of experience in the private sector in contamination assessment/remediation, geotechnical investigations

and offshore exploratory drilling. Additionally, Arnold has more than 14 years of experience in well design, permitting, compliance, policy, and contractor licensing at the District. Arnold has been in his current position for more than eight years and continues the District's dedication to a common-sense approach in the well construction permitting and compliance program with a strong dedication to protecting the groundwater resource. Arnold earned a Bachelor of Science Degree in Geology from the University of South Florida and is a Florida licensed Professional Geologist.

ALAN BIXLER

Alan Bixler is Sr. Technical Sales Manager for the SE Region at Grundfos Pumps. Alan has been with Grundfos for 14 years in technical roles of increasing responsibility and product knowledge. In 2014, Alan took the role as Sr. Technical Sales Manager for the Southeast US market for groundwater and irrigation. In this role, he supports Grundfos' distribution partners and contractors with application

and technical knowledge of Grundfos products in water systems and irrigation.

ERIC DUDERSTADT

Eric Duderstadt is an environmental biologist with Water Systems Engineering Inc., of Ottawa, Kansas where he works as a consultant. He earned his bachelor's degree in Biology from Ottawa University and has since become certified as a Corrosion Technologist within the NACE (National Association of Corrosion Engineers) organization. He also works within the firm's research department and investigative

laboratory centering on microbiology and chemistry. The company is a multi-tiered firm which specializes in ground water and surface water applications, distribution water handling systems, and corrosion analysis and control.

THOMAS HANNA

Thomas Hanna has a Master of Science in Geology degree from Western Michigan University. Thomas is a registered PG in Wyoming, Kentucky and Arizona. Since 1999, Thomas has worked for Johnson Screens, currently the Technical Director Water Well Products/Hydrogeologist providing technical support with the design of wells and use

of well products for water supply, groundwater contamination and well rehabilitation. Expertise includes design of wells for maximizing production in large-diameter, deep well installations. Involved with teaching classes for efficient well design, material selection, well development and well rehabilitation.

SENIOR TROOPER MARK J. HORN

Mr. Horn has 15 years with the Florida Highway Patrol. Troop J-Orlando, Firearms Instructor, Law Enforcement Vehicle Operations Instructor, ALERRT (Advanced Law Enforcement Rapid Response Training) Instructor, ALERRT Solo Officer Response trained.

DOUG KELLER

Doug was born and raised in Idaho. Doug went to the University of Idaho and graduated from Boise State University with a BA in Production and Operations Management. Doug has been with Baroid International Drilling Products for 13 years and worked in mining, exploration drilling, coring, reverse air (dual tube) dewatering, water wells and injection wells. Doug relocated to Salt Lake City, Utah and worked in mineral exploration (coring dual and tube reverse

air), air - foam drilling, flooded reverse drilling, drilled shaft, directional drilling in construction, micro tunneling and mud rotary. Doug's Western coverage was Utah, Southern Idaho, Western Colorado, Southern Wyoming, and Eastern Nevada. The opportunity to move to Florida surfaced where Doug has worked with slurry walls, tunneling, drilled shaft, directional drilling in construction, micro tunneling, air-foam drilling and mud rotary. Doug has been a field representative (mud engineer) for 13 years. Doug's main duty is to help drillers use the right products and the right quantities.

STEWART KRAUSE

Stewart has been employed by Wyo-Ben, Inc. since 1978. During this time, he has served in many different capacities involving the Oil & Gas, Mining, Environmental, Industrial, and Water Well industries. Stewart is involved in the product development and site applications of Wyo-Ben's Groundwater & Mineral products. Stewart is recognized by the Petroleum Extension Service at the University

of Texas / Austin as an instructor for drilling fluids application. Stewart teaches several drilling fluid and grouting seminars each year for the Groundwater industry and is a past chair of the manufactures board of the NGWA.

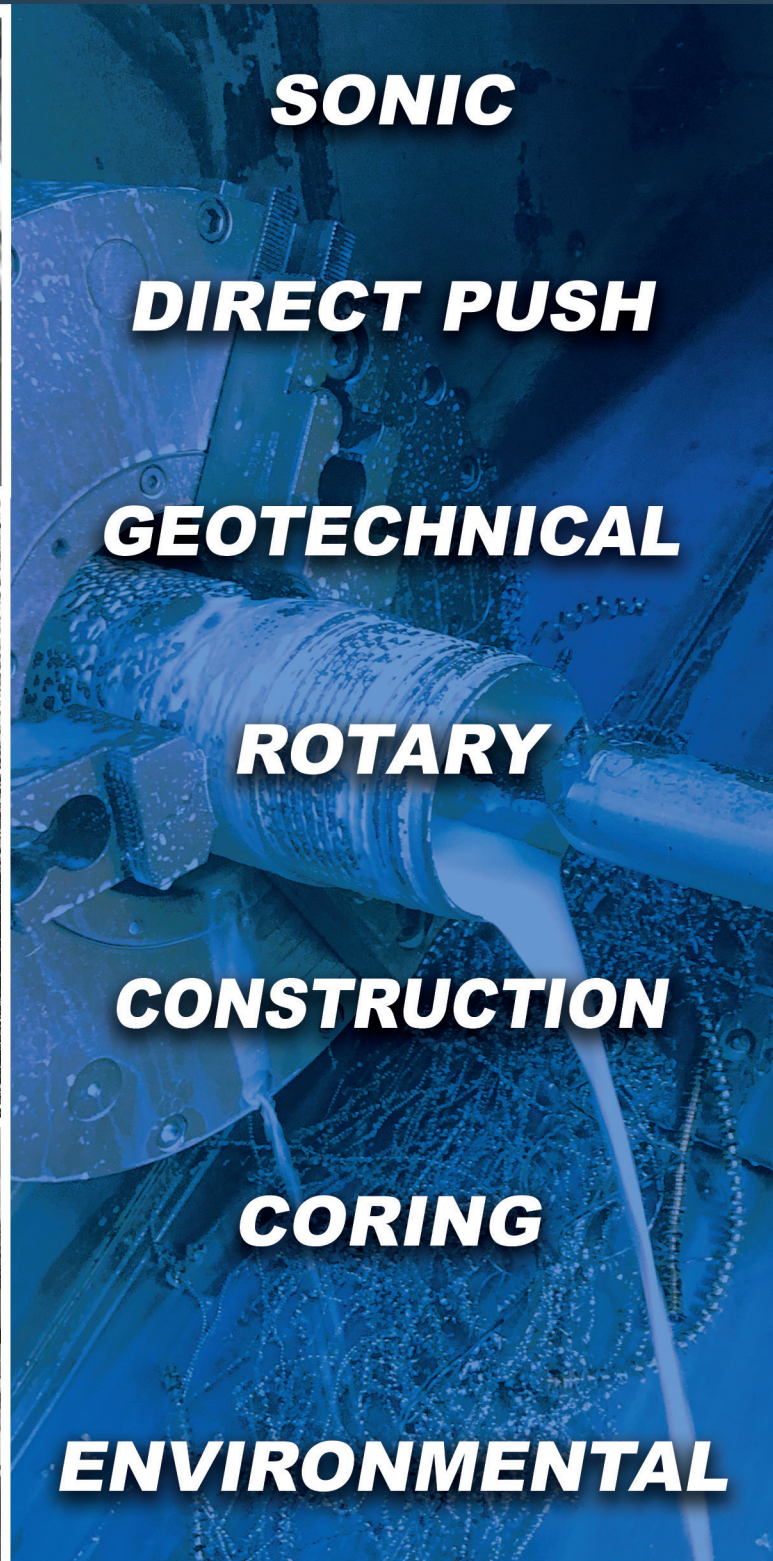

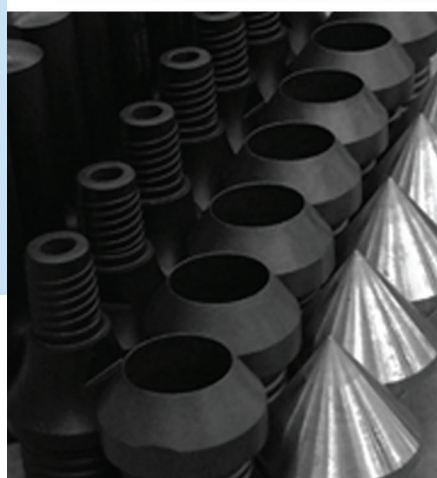

BOB LILLAND

Bob is a Field Service Engineer for Franklin Electric, a worldwide leader in the submersible motor industry. Bob's job consists of assisting contractors in the Florida, Georgia, Alabama and the Caribbean Islands, with issues with water well pumps, starters, VFD drives, solar, etc. Bob also does training seminars to help educate contractors with installation and troubleshooting of these products. Bob is a third-generation water well contractor, being

in the industry for 30 years. Bob has a current Water Well Contractors license #9269 and just sold his well drilling company of 15 years to work with franklin electric. Bob has been the President of the West Coast Chapter of the Florida Ground Water Association for 4 years, current sitting Past President, and has been on the board of directors for over 10 years. Bob is currently on the Board of Directors for the Florida Ground Water Association.

MEET YOUR SPEAKERS, CONTINUED

JOHN MARTINUZZI

John Martinuzzi has over 38 years of geotechnical and environmental drilling experience, ranging from field-technician, to drilling operator, to drilling supervisor. As an Operations Manager for Direct Tech, Fort Pierce, Florida, he supervised CPT and Drilling Operations. Prior to that, John was the President and Owner of LMC Environmental, an industrial cleanup

and drilling company. Mr. Martinuzzi also served as Senior Project Manager for Nutting Environmental where he supervised the Drilling and Environmental Department. John joined Geoprobe Systems® in the early 1990s and has been responsible for all customer relations activities in the Southeast region for the company, which includes field demonstrations, product and tooling reviews, new tooling development, machine maintenance, and day-to-day customer contacts. John currently holds a Florida Water Well Contractor license (#11079).

RYAN MATTHEWS

Ryan served in Governor Scott's leadership team as the Interim Secretary of the Florida Department of Environmental Protection, where he led an agency of just under 3,000 employees and oversaw an annual budget of \$1.6 billion. Prior to becoming Interim Secretary, Ryan served as the Deputy Secretary for Regulatory Programs for the department, where

he managed and directed the air, water, and waste regulatory programs in Tallahassee and at DEP's 6 district offices. These programs carry out DEP's role in permitting facilities and operations (such as manufacturing, power plants, small and large businesses) and providing them assistance with compliance. In addition to serving as the head of the agency, Ryan began his time at DEP as Director of the Office of Water Policy. In that role, he directed the coordination and implementation of Florida's statewide water policy with the five water management districts as well as state agencies and local governments. As Director of the Office of Water Policy, Ryan was appointed Steering Committee Chairman of the Central Florida Water Initiative, an effort to ensure adequate water supply for the State of Florida by 2035, in addition he convened and oversaw the department's efforts as Chair of the Reclaimed Water Working Group whose goal was to study and recommend changes to Florida's regulatory and statutory scheme as it relates to reclaimed water. Prior, Ryan served in both the General Counsel and Legislative Affairs offices of the Florida League of Cities where he advocated on behalf of Florida's 412 municipalities with a focus on: water quantity, water quality, wastewater, utilities, telecommunications, waste management, general election issues, growth management, and transportation issues. Ryan has worked at all levels of government having previously worked for a state senator, as well as spending 2 years on the Hill in Washington D.C., working for Senator Bill Nelson. He is also experienced in campaigns having been political director for the Jeff Kottkamp for Attorney General campaign. Ryan received his B.S. in Political Science from the University of Florida, a J.D. from the Florida Coastal School of Law and also his L.L.M. in Environmental Law from Denver University.

LARRY OXENHAM

Larry Oxenham is one of America's top asset protection experts, having helped thousands of professionals achieve financial peace of mind by teaching them how to properly structure their assets for lawsuit protection and tax reduction. He has authored and co-authored several articles and books on the subject including The Asset Protection Bible and How to Achieve Financial Peace of Mind through Asset Protection. His career has been

credited with helping thousands of people save millions of dollars. Larry Oxenham is a nationally recognized speaker who has trained thousands of professionals at hundreds of conventions, conferences and seminars across the country. Larry has a Business Degree from Mt. San Antonio College, Walnut, CA. Larry has over 20 years' experience presenting educational seminars and workshops to hundreds of associations.

JIM SMITH, MS, CSP

Jim Smith is Vice President of Specialty Safety at the nation's largest light industrial staffing company, Employbridge. Jim is responsible for safety within the Specialty division of Employbridge to include transportation, construction, and oil & gas operations. Prior to joining ProDrivers in 2010, Jim spent 10 Years as a Regional Safety Manager for one of the nation's largest private fleets. Jim holds both a Bachelors and Master's degree in

the field of safety. In addition, he is one of only 2% of Transportation Safety Professionals to hold the nation's most distinguished safety designation, the Certified Safety Professional (CSP). Jim is an authorized OSHA outreach trainer for General Industry. He was certified by General Electric in 2001 as a Six-Sigma Black Belt. He is currently a member of the American Society of Safety Professionals and serves as a member of the American Trucking Association's Safety Management Council.

DONNIE WOOD

Donnie Wood has more than 20 years of hands-on rig support, customer service support, and machine sales experience in the drilling industry. Donnie started in the drilling industry with Mid America Drilling Equipment in the parts department ordering parts for new machines and taking customer phone calls as a customer service representative. A couple years later he added machine sales to his list of duties. During 2003 DRILLMAX® was formed and

he began splitting his time between machine sales and assembly. In 2017 when Kejr, Inc (Geoprobe Systems®) purchased DRILLMAX®, Donnie became general manager of DRILLMAX® and the Southeast Service Center in Ocala, Florida. Today his duties include machine sales, new rig start-ups for customers, and customer service to the DRILLMAX® product line.

WARREN ZWANKA, P.G.

Warren Zwanka is Resource Management Division Director at SRWMD, overseeing the Environmental Resource, Water Use Permitting, and Water Well Permitting programs. He has worked 25 years at both SRWMD and SJRWMD conducting hydrologic monitoring, abandoned artesian well plugging, geophysical logging, deep observation well drilling oversight, and permit review. He holds a BS in Geology from the University of South Carolina, a

MS in Soil and Water Science from the University of Florida, is a licensed Professional Geologist in Florida and Georgia, and is a Florida licensed water well contractor.

WE GOT

FLAVORS

with a cherry on top

OH YES, WE DO!

We also have valves, and lots of them!

You might know Flomatic for our robust and efficient check valves or the space saving Cycle Gard® Constant Pressure Pump Control Valves. Maybe you started using our Automatic Flow Control Valves for low yielding wells.

With one of the widest selections of valve products in a variety of materials, pressure ratings, and configurations you can count on Flomatic to help you complete your next job – ***no matter how complex the application.***

PROVEN DM250

Drillers notice the attention to detail DRILLMAX® engineers placed on making their jobs easier. From *simple operation and surprising power to fast production with 22-foot stroke*, there is loads of added value.

- efficient mobilization under class A/B CDL with creature comforts of factory 4X4 chassis
- power of a large rig contained in a small footprint
- production provided by head speed, rod loader, and helper side controls
- durable, mechanical controls make training new drillers easier
- production consistency possible by array of mud pump options
- physical comfort created by wide driller's platform
- easy adjustment and longer life of rollers on tophead carriage
- simple maintenance and troubleshooting via deck access panel enabling work from above the rig

**OPTIONAL
CAROUSEL
and SMALL
ROD BOX**
*Carry eight,
3-inch rods with
additional five in
the box.*

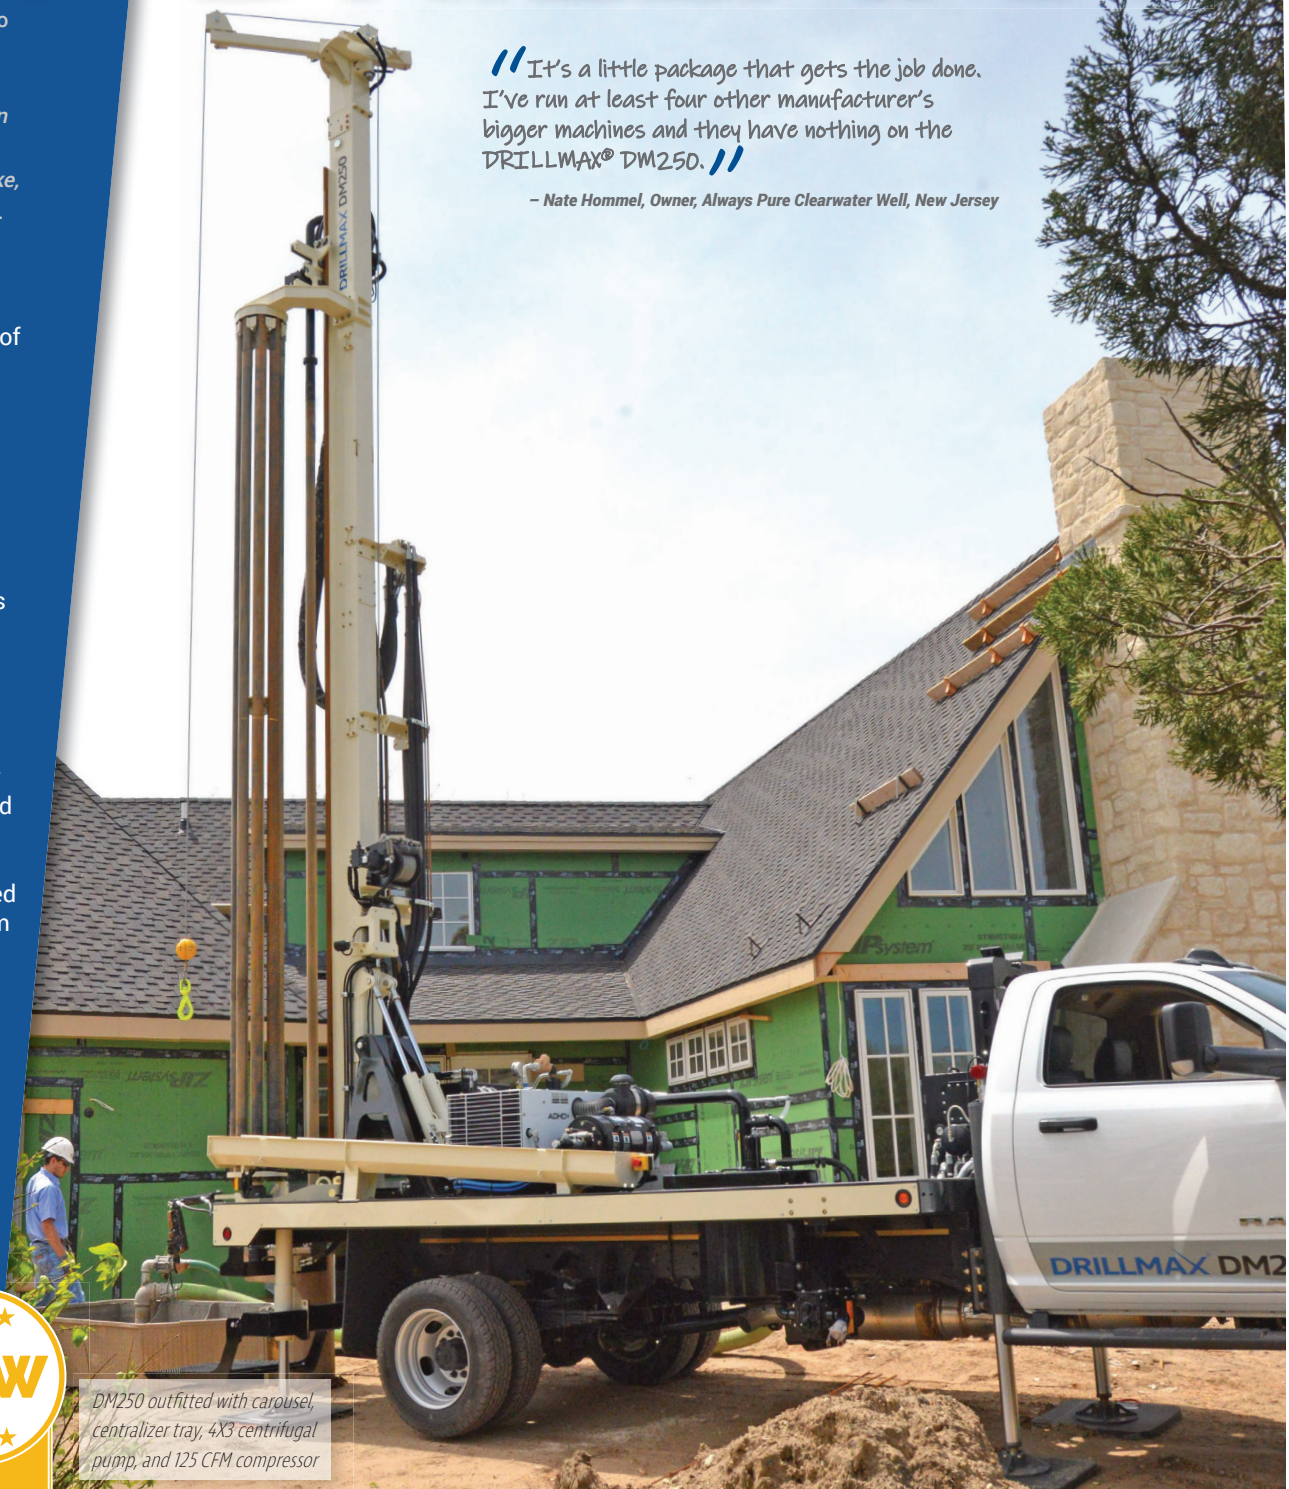

*DM250 outfitted with carousel,
centralizer tray, 4X3 centrifugal
pump, and 125 CFM compressor*

6011DT

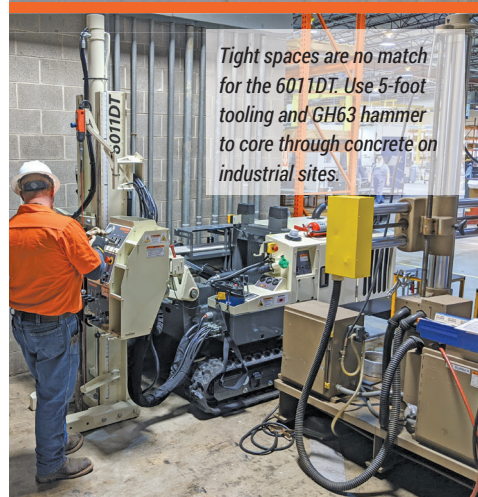

Limited Access Rig

- efficiently track into tight spots or tough terrain
- power through with proven GH63 percussion hammer
- sized to slip into tight spaces and easily mobilize

[▶ geoprobe.com/6011DT](http://geoprobe.com/6011DT)

Narrow 48-inch footprint of 6011DT easily sneaks between side of building and property fence for direct push sampling.

Geoprobe

Tight spaces are no match for the 6011DT. Use 5-foot tooling and GH63 hammer to core through concrete on industrial sites.

Great for indoor spaces available with low-clearance cylinder option.

Big Power, Small Package

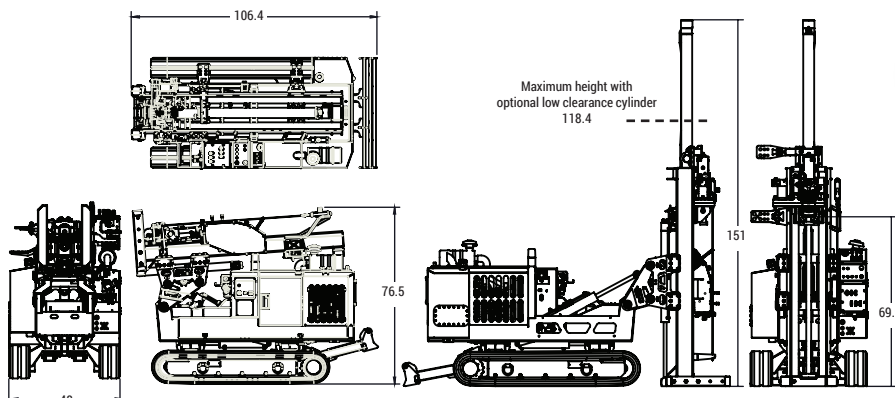

- 48-inches wide
- 4,800 lb direct push only platform
- 44 horsepower engine
- GH63 percussion hammer
- Uses 5-foot tooling
- Rear stabilizer blade works with Geoprobe® drop racks
- Load-sense hydraulics reduce fuel consumption
- Optional low clearance cylinder
- Affordable price point
- Suited for Direct Image® logging tools and CPT
- International configuration with engine for lesser regulated countries
- Tier 4/Stage V engine available by end of 2021

[▶ geoprobe.com/6011DT](http://geoprobe.com/6011DT)

WATCH why drillers seeking a small footprint but big direct push power choose the 6011DT with its GH63 percussion hammer.

Water-Right has manufactured water conditioning systems for residential, commercial and industrial markets since 1959. Their Sanitizer Plus Series employs a unique silica-crystal media that effectively removes hardness, iron and manganese and raises pH levels.

PROFESSIONAL CALIBER
MADE IN THE USA

Independent Water Chamber: CAD2

- Allows diaphragms to be sized properly for each tank.
- Insulating air gap surrounds water chamber and prevents condensation.
- Impregnated with anti-microbial silver ion to inhibit bacterial growth.

Tank Finish

- Well-Rite Plus and Outdoor Challenger: coated with 8-10 mils of high-mastic epoxy and a 2-part urethane finish for the best salt spray and UV characteristics on the market.

Flex-Lite: Lightweight and Non-Corrosive

- All composite construction and our CAD2 diaphragm combine to create the only non-metallic pressure tank with an independent water chamber on the market.

Water Connection

- Stainless steel (PCFR & WR) or durable, schedule 80 PVC water connections stand up to the toughest conditions.

www.flexconind.com

INSPIRED SOLUTIONS FOR A CHANGING WORLD

These words tell us everything we need to know about what we do. And why we do it.

A CHANGING WORLD

The world's population is growing, and with it a global middle class will soon surpass four billion people. This profound shift in demographics puts tremendous stress on our water, food, and energy supplies. And they're interdependent—we need water to grow food and generate energy, and we need energy to move and treat water and process food. At Pentair, we envision a future with safe water, abundant energy, and affordable food that protects the health and vitality of our planet and its people. It will take great companies to meet this challenge, those with inspiring culture, industry-leading solutions, longstanding partnerships, and a commitment to high performance. Pentair is one of these companies. We combine global perspective and deep expertise to develop real solutions that help the world get more food, energy, and efficiency from each drop of water.

INSPIRED SOLUTIONS

Our changing world requires bold solutions, new thinking, integrated, and innovative ideas. As the world's demographic trends continue to shift, putting increasing demands on the world's resources, Pentair is delivering solutions to help its customers meet the needs of this changing world — a world that is demanding more energy, water and food. Pentair invents and manufactures solutions that address some of the world's toughest challenges, with over 75 percent of our products, services and technologies related to food, water or energy. Collaborating with industrial partners, government, non-governmental organizations, and other companies, we serve a wide variety of customers in the food and beverage, residential and commercial, industrial, infrastructure, and energy verticals.

OUR CHANGING WORLD IS AN EXCITING, BEAUTIFUL, DIVERSE, CROWDED, AND COMPETITIVE PLACE. IT DEMANDS SAFE WATER, ABUNDANT ENERGY, AND AFFORDABLE FOOD. AND IT INSPIRES US ALL TO STEP UP. TO WORK TOGETHER. TO PROVIDE SOLUTIONS. BECAUSE WHEN WE DO, THE WORLD BENEFITS.

ENERGY SOLUTIONS FOR ENERGY EFFICIENCY AND RELIABILITY

As demand for energy increases, consumers, industry, and communities across the globe are striving to reduce energy consumption and waste. Pentair makes products that help reduce energy costs as well as provides solutions for the energy industry to keep vital operations running efficiently, effectively, and safely. We also provide reliable products that can withstand harsh environments which help increase efficiency and decrease maintenance and downtime for our customers.

WATER + ENERGY SOLUTIONS FOR THE REUSE OF CRITICAL RESOURCES

Managing scarce water supplies is critical to delivering the world's increasing energy needs — water is used to create energy while energy is used to treat water. Pentair designs and manufactures advanced technologies for the separation of solids, liquids, and gases for the treatment and reuse of water. Our technologies also enable customers to reclaim energy from wastewater streams.

WATER SOLUTIONS FOR CLEAN, SAFE WATER

Pentair is a leader in helping to manage the world's precious water resources. We help businesses and communities better manage and treat their water supply — returning it safely to the environment or recovering and reusing it for other applications. We help make clean, safe water more available and affordable for drinking, recreation, residential applications, and commercial and industrial operations.

WATER + FOOD SOLUTIONS FOR FOOD AND BEVERAGE PRODUCTION AND PROCESSING

Pentair provides solutions globally for the food and beverage industries from seed to table, working across the entire spectrum of cultivation, process, and delivery. With the world's demographics rapidly changing, Pentair's technologies help efficiently manage food and beverage production so that our customers can increase yield and quality, as well as produce food in new ways. Our technologies to optimize energy and water resource usage for food and beverage processing provide customers more sustainable solutions while helping reduce their impact on the environment.
